Education

B.Tech, Mathematics and Computing, IIT Goa,

CPI: 6.69/10

2023 – Present

Experience

Software Development Intern under Prof. Rahul CS

May 2025 – Present

- Currently contributing to backend development by designing schemas and debugging system issues.
- Collaborating with the development team to optimize and extend system capabilities.

Goa Police Hackathon

Oct 2024

- Selected among the top 32 teams out of 100+ participants for a government-led cybersecurity hackathon.
- Developed core logic for detecting suspicious websites in a fraud detection system.

Projects

Alumni Management System [\[GitHub\]](#) [\[Demo\]](#)

March 2025 – Apr 2025

- Developed a full-stack alumni portal using the MERN stack to manage student profiles, alumni data, and placement statistics.
- Implemented secure authentication with JWT and role-based access for students and admins.
- Designed dynamic dashboards with advanced filtering for academic scores, alumni placement packages, and batch/branch-wise data.
- Built profile update workflows with admin approval and feedback mechanisms.
- Created RESTful backend APIs using Express.js and integrated MongoDB for data storage.
- Styled responsive frontend using React.js and Tailwind CSS, ensuring seamless user experience across devices.

Note: Candidate interface available for demo (you can sign up and login), admin access on request.

Fraud Detection System [\[GitHub\]](#) [\[Demo\]](#)

Oct 2024

- Built a full-fledged AI-powered web application to detect and flag fraudulent websites, developed as part of the Goa Police Hackathon (Team Project).
- Implemented multi-layered website analysis including SSL certificate validation, domain age registrar checks, phishing keyword detection, and suspicious pattern recognition.
- Developed real-time risk assessment logic using Google Gemini AI to assign a dynamic 0–100 fraud risk score per URL.
- Integrated with Goa Police database to cross-reference and auto-update entries with newly flagged and extracted contact details.

Secure Interview System (In Progress)

May 2025 – Present

- Building a secure, full-screen interview and coding platform using Electron and Node.js to prevent cheating during remote assessments.
- Implemented kiosk-mode interface with window lock, global shortcut blocking, and process monitoring for real-time security enforcement.
- Working on API request filtering and screen freeze mechanism on focus loss to block AI tool access and unauthorized multitasking.
- Actively debugging and learning advanced system-level techniques to build a production-grade tool.

Skills

Programming Languages: C++, Python

Web Development: HTML, CSS, JavaScript, Nodejs, Expressjs

Databases: MongoDB

Libraries & Frameworks: BeautifulSoup, Flask, WHOIS, Spacy, requests

Relevant Coursework: Algorithm Design, Probability and Statistics, Software Tools(Linux commands, Github), Algebra

Achievements & Extracurricular

- Leetcode rating: 1650+
- Selected to represent IIT Goa in the Inter-IIT Basketball Championship, highlighting commitment, teamwork, and athletic discipline.
